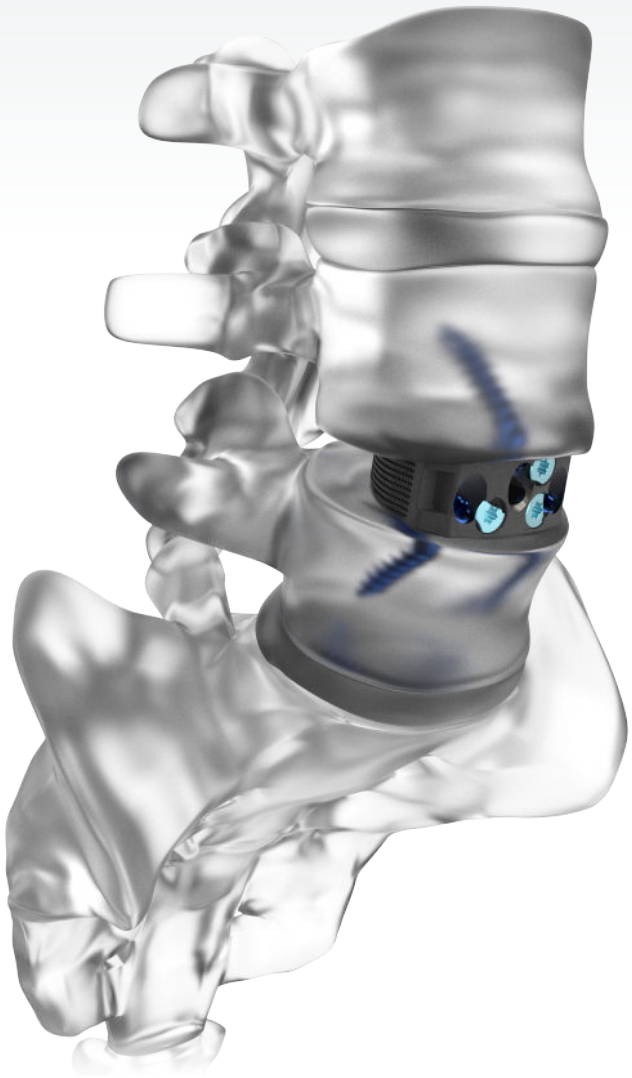
Thoracolumbar Solutions

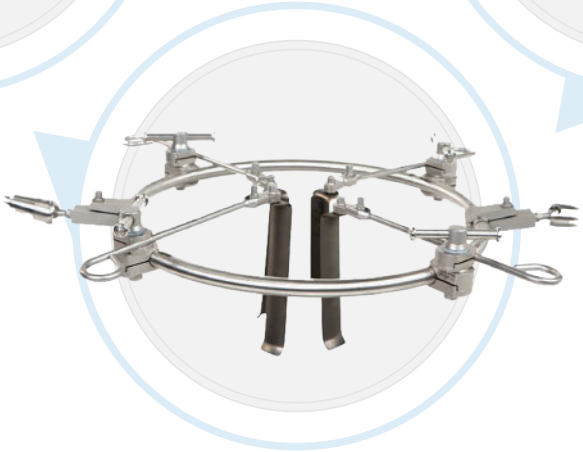


Anterior Lumbar Solutions

Your Entire Procedure Covered

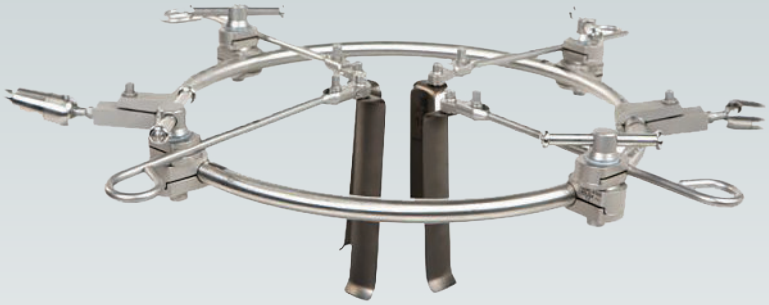
ZimVie

The ALIF Solution



Access

Zimmer Biomet Anterior Retractor



- Two-point fixation
- Secure blade connection
- Tactile adjustment of blade angulation
- Fixed or rotating blade engagement
- Low-profile user-centered design
- Blades ranging from 60 to 200 mm in length
- Blade widths of 25 and 50 mm

Biologics Solutions

PrimaGen Advanced™ Allograft

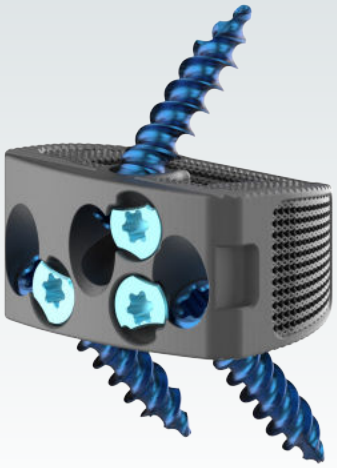
- Developed to overcome the limitations of other bone graft substitutes
- Designed to offer a real alternative to autograft
- Contains at least 750,000 cells/cc of cancellous tissue with at least 70% cell viability[1]
- Fiber based bone matrix for convenience and improved handling‡

InterGro® DBM

InterGro DBM is a verified, osteoinductive, and demineralized bone matrix in a natural lecithin carrier, and is available as:

- DBM Putty – 40% DBM content by weight
- DBM Paste – 35% DBM content by weight
- DBM Plus – 35% DBM content by weight and premixed resorbable coralline hydroxyapatite/ calcium carbonate granules

Interbody



TrellOss®-A SA Porous Ti Interbody System

- Anatomically matched profile
- Ample graft window balanced with lattice landscape
- Self-tapping screws designed with tip-to-tail thread pattern
- Integrated one-step turn lock feature
- Optimized location of screw pockets to allow for consistent bone purchase

A New Foundation for Growth

- Scaffolding structure provides additional surface area[2,3]
- 7 micron surface texturing creates an environment for potential cellular adhesion[2,3,4]
- Open architecture with 70% porosity including varying pore sizes of 300, 500, and 700 microns that mimic cancellous bone allowing for a conducive environment for cellular activity[5,6,7,8]

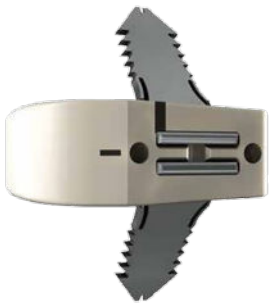
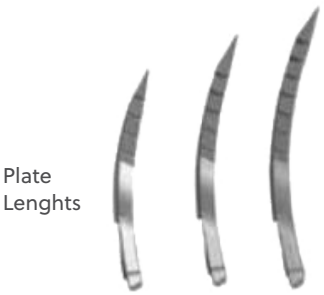
ROI-A® ALIF Cage

- Innovative VerteBRIDGE® plating technology to deliver integrated fixation in the same plane as the disc space
- Multiple footprints, lordosis, and heights for optimized fit
- PEEK-OPTIMA® material for biocompatibility and radiolucency
  - -Tantulum markers for verification of cage positioning
  - -Self-guided, self-locking plating system



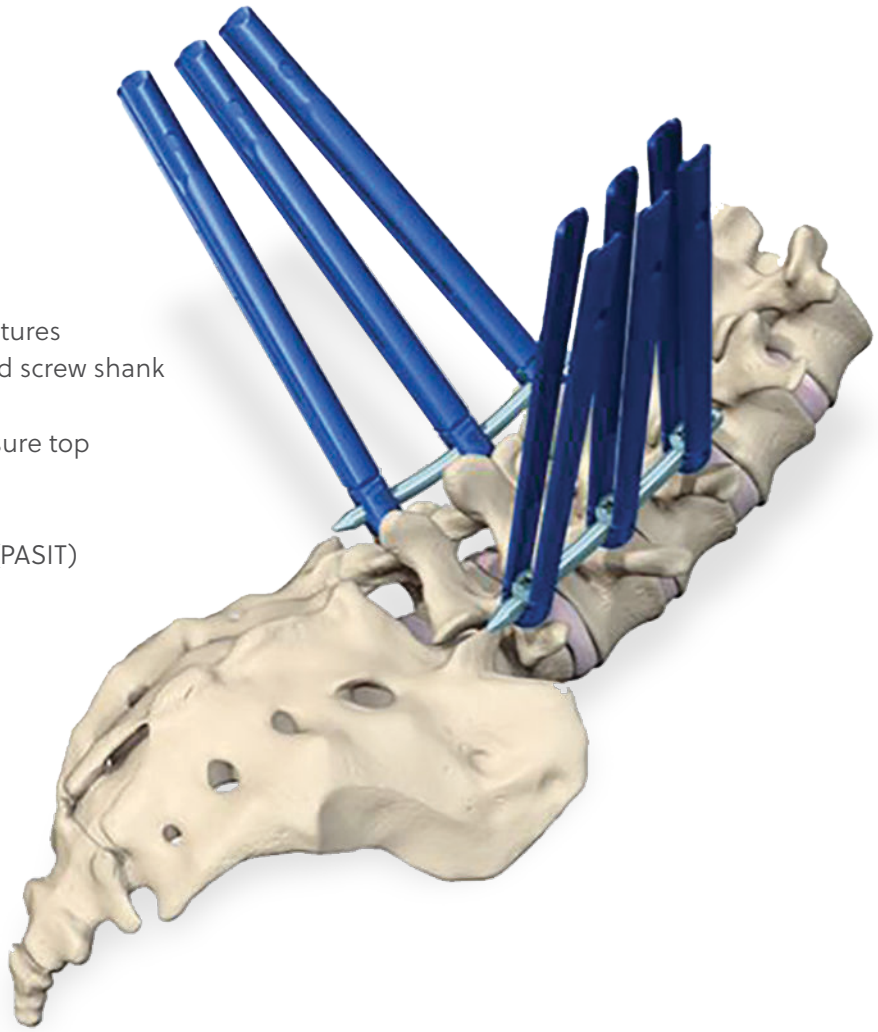


Fixation

Epic™ Anterior Thoracolumbar Plate

- Strong, low-profile plate
- Lumbar and sacral plate options
- Single-step cover plate
- Fixed and variable screw angles
- Unique screw thread design for excellent bone-screw fixation
- 18° conical range of screw insertion angles
- Simple, intuitive instrumentation

Vital™ MIS Spinal Fixation System



- Integrated extension tabs
- Multiple instrument connection features
- Fully threaded cannulated dual-lead screw shank
- T27 Hexalobe drive feature
- Dual-lead reverse angle thread closure top
- Percutaneous rod options
- Pedicle access tool (PAT) and
- Pedicle access screw insertion tool (PASIT)
- Reinforcement sleeve
- Multiple rod inserters
