MIS Access and
Disc Prep Systems

Maximize MIS Visualization

The Viewline Tube Retraction System, Retractor System and Posterior MIS Disc Prep System facilitate exposure, retraction, decompression and disc preparation for MIS TLIF/PLIF/PLF and microdiscectomy procedures. These systems offer state-of-the-art design with bright, white LED light delivered through dual light ports for increased visualization and a rotating accessory arm to maximize working space. The Viewline System's comprehensive range of radiolucent aluminum blade and tube options provides customizable access options to help streamline your MIS procedures. In addition, the Viewline Tube Retraction System and Retractor System are both compatible with the WalterLorenz® Surgical Assist Arm.

Viewline Tube Retraction System

State-of-the-Art Design

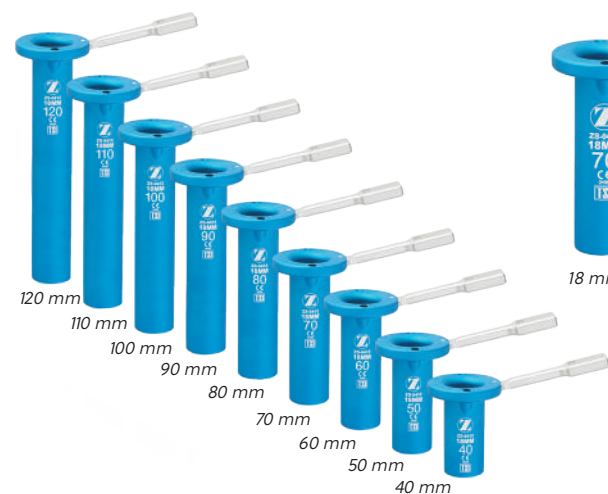

- Radiolucent for enhanced visualization on fluoroscopy
- Angled attachment arm to minimize tube profile
- Rotating table clamp allows for multiple anchoring angles to maximize working space
- LED light source maximizes visualization while reducing heat exposure.

Comprehensive Range of Options

- Tube lengths in 40 mm – 120 mm options
- Three tube diameters – 18 mm, 22 mm, 26 mm

Multiple Tube Lengths for Each Diameter

Three Diameters

Five Dilator Options

Viewline Retractor System

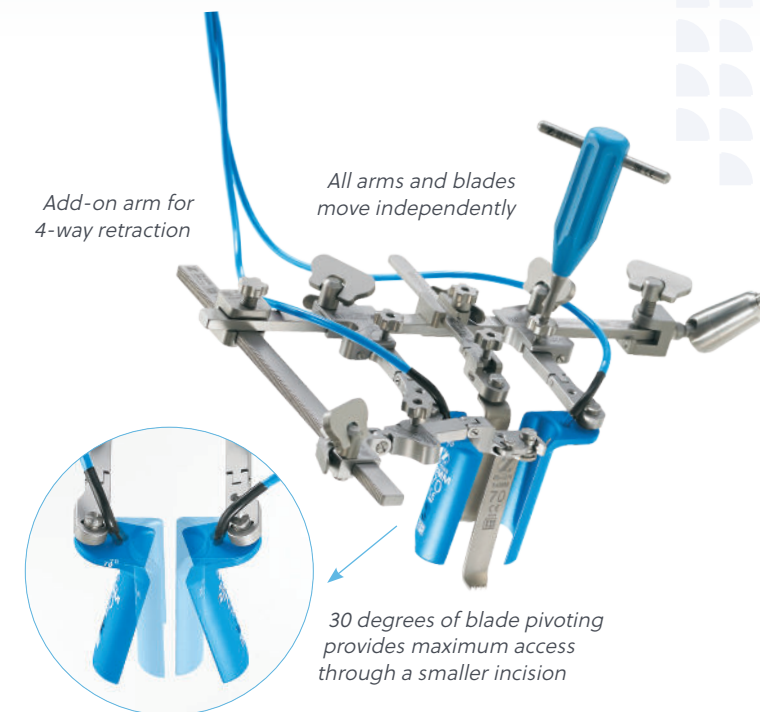

State-of-the-Art Design

- 30 degrees of blade pivoting provides maximum access through a smaller incision
- Two, three or four blades that move independently for maximum customization
- Rotating table clamp allows for multiple anchoring angles to maximize working space
- Two choices for dilation; dilator or obturator
- LED light source maximizes visualization while reducing heat exposure.

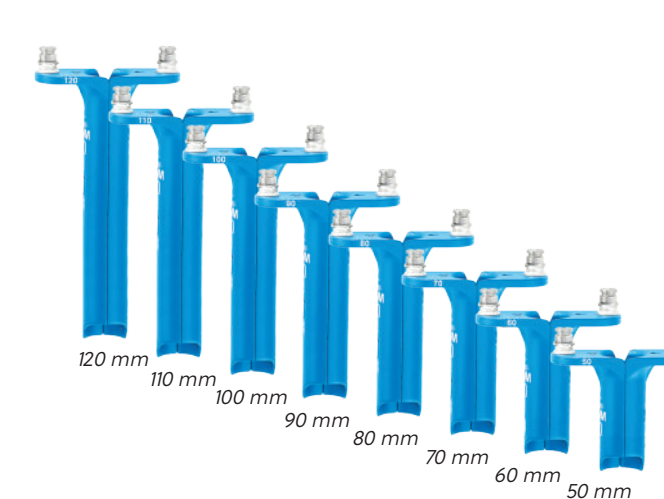

Comprehensive Range of Options

- 50 mm - 120 mm blade length
- Two, three or four-way retraction

Two Diameters

Multiple Blade Lengths for Each Diameter

Two Choices for Dilation

Viewline Posterior MIS Disc Prep System

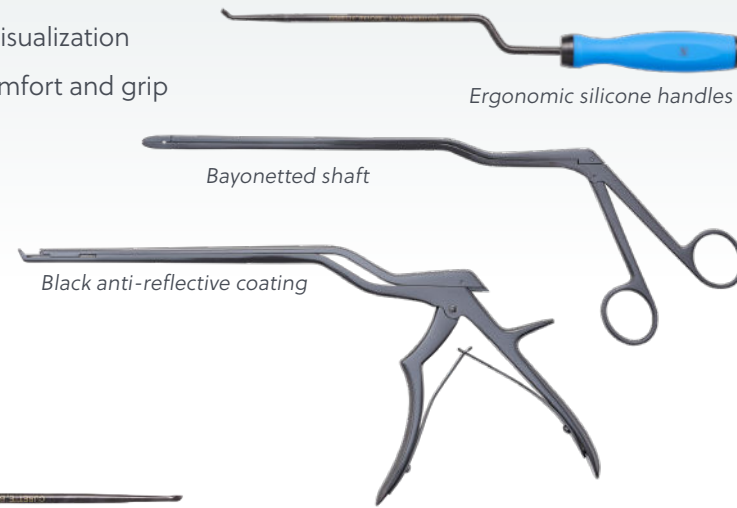

State-of-the-Art Design

- Bayonetted shaft for improved visualization
- Black anti-reflective coating for improved visualization
- Ergonomic silicone handles for surgeon comfort and grip

Comprehensive Range of Options

- 10 curette options
- 9 pituitary rongeur options
- 5 nerve root retractor options
- Various dissection instruments

Curette Options

Dissection Instruments

Pituitary Options
